

Open Legacy. Open Innovation. Open API.

**Leverage your legacy systems. Create APIs in minutes.
Innovate 10x faster. Because the race is on.**

“OpenLegacy set our mainframe free”

Global Bank

”Within an hour we went from nothing to a working API connected to our payments app.”

“We developed web services at a fraction of the cost of IBM”

Automotive Plus

”Coupled with its performance, security, and fast time to market, the ROI was instant”

In today’s mobile world, consumers expect instant access to information and services—if they don’t get it, they move on. For established companies, keeping up with customer expectations can be extremely challenging, especially when they have a mix of back-end technologies that aren’t fully compatible with web, cloud or mobile technology. Those companies that want to retain their existing customers—and attract new ones—must find a way to fast track their consumer-facing service projects.

While striving to create these new applications, organizations often find themselves dealing with a backlog of APIs they are trying to deliver from their legacy or on-prem systems. They are not fast enough to make a dent in their backlog—typically needing to add more staff, learn too many tools, or simplify a complex integration stack overburdened with middleware.

Leverage your enterprise applications and innovate like a nimble startup

OpenLegacy connects your legacy systems to the modern world through standard APIs. You can generate new cloud, web and mobile solutions from your legacy systems automatically, easily and rapidly. OpenLegacy eliminates the need for complicated, expensive integration platforms and brittle, unreliable screen-scraping technologies.

Break-thru backlog

Innovate faster. Bring new apps and services to market in weeks not years. Immediately react to market changes.

In minutes

Create APIs in minutes using automated tools, deploy as projects in days or weeks. No need to change underlying legacy applications, no new skills or training required.

Reduce risk

Save on resources and expensive middleware while complying with all security standards and using the latest open standards like global APIs, Java, and microservices.

“The code it generates is a breeze to update and extend”

Harel Insurance

“Each agent saves about **20-30% in the field with mobile-generated insurance.**”

Standard, secure, fast microservice-based APIs in minutes

- **Automated microservices creation direct from legacy systems**
- **Bypass existing complex middleware, reduce technical debt**
- **Legacy microservices in the cloud, container or on-prem**
- **Production ready APIs in hours or days**
- **100% open standards and java-based platform, modern tech**
- **Independent microservices simplify future legacy migration**
- **Align with DevOps, CI, CD**
- **Continuously supported, low TCO, immediate ROI, skills, subscription-based**

DESIGN

OpenLegacy IDE

Solve integration challenges by automatically generating Java code that exposes your APIs

DEPLOY

OpenLegacy Microservices Architecture

Deploy full microservices solution with rich run-time environment to support scaling and high availability

MANAGE

OpenLegacy Management Console

Manage and monitor applications and APIs with full API Management functionality out of the box

About OpenLegacy

OpenLegacy helps organizations quickly launch innovative digital services by extending their legacy and on-prem systems to the web, mobile and cloud in days or weeks versus months. Our API software quickly reduces project backlog by automating and accelerating API creation, deployment, testing and management from core applications, mainframes and databases. Together, business and IT teams can quickly, easily and securely meet consumer, partner or employee demands for digital services without modernizing or replacing core systems, and without special programming skills or invasive changes to existing systems and architectures. Learn why leading companies choose OpenLegacy at www.openlegacy.com.
