

MOST Software Technologies Ltd. is a provider of innovative modernization solutions to customers with legacy applications on both IBM mainframe and iSeries. These solutions mitigate risk and reduce the total cost of ownership of these legacy applications.

MOST serves enterprises by providing:

- Highly skilled professionals experienced in mainframe and open systems technologies
- **OnTarget** suite of tools to automate modernization, conversion and migration
- Proven methodologies for legacy modernization and migration

MOST's experts use our OnTarget technology to convert or migrate non-relational databases to relational databases. We also can convert traditional code to languages such as C# and Java while automating the modernization process by redesigning the applications to modern architectures.

MOST has been delivering solutions to mainframe customers since 1999 and established a presence in the US in 2003. MOST Technologies Japan was established in 2009.

MOST Professional Services staff is deeply skilled in mainframe, iSeries and open systems technologies with highly qualified expertise in areas such as IBM mainframe and midrange environments, Software AG, DB2, Open Systems, Oracle and J2EE technologies.

MOST provides innovative solutions to customers in North and South America, Europe and Asia with deep experience in Japan. MOST's list of satisfied customers includes Aflac USA, Aflac Japan, Delta, Dole, Kawasaki Heavy Industries, Nissan, Telus in Canada, and others.

Our customer base includes major government agencies, such as the Israel Electric Company and Ministry of Transportation of Israel, as well as financial institutions such as Credit Suisse, Bank Hapoalim, Bank Leumi and Bank of Israel.

MOST has partnered with the world's leading solution providers including HP, IBM, Micro Focus, Infosys & Wipro. We can work direct with a customer or through their preferred IT vendor-of-choice.

MOST Technologies is a subsidiary of Malam-Team, a leading distributor and system integrator having >3,500 employees and publicly traded on the Israeli Stock Exchange. For more information please visit us at: www.mosttechnologies.com or mail us at: info@mosttechnologies.com

- Application Renovation & Reengineering
